

 **Learning Objective:** To use efficient written and mental strategies to solve subtractions

Solve your subtraction by taking away the tens and then the ones.

$$89 - 25 =$$

20	5
----	---

$$89 - 20 = 69$$

$$69 - 5 = 64$$

This strategy is called **partitioning** or the **split strategy**. In subtraction, this is when you break the smaller number into tens and ones.

$89 - 25 = 64$	$73 - 27 = \square$	$92 - 63 = \square$
$74 - 32 = \square$	$96 - 24 = \square$	$83 - 51 = \square$
$86 - 53 = \square$	$74 - 45 = \square$	$38 - 21 = \square$
$95 - 38 = \square$	$40 - 23 = \square$	$77 - 65 = \square$

Complete the questions below.

Use the number line to solve the subtraction.

$$35 - 23 = \square$$

Use the number line to solve the subtraction.

$$24 - 17 = \square$$

Rearrange your number sentence and use the counting on strategy to solve your subtraction.

$\square + \square = \square$
$24 - 17 = \square$

Solve your subtraction by taking away the tens and then the ones.

$$56 - 12 = \square$$

Solve your subtraction by taking away the tens and then the ones.

$$94 - 62 = \square$$

 **Learning Objective:** To use efficient written and mental strategies to solve subtractions

Solve your subtraction by taking away the tens and then the ones.

$$89 - 25 =$$

20	5
----	---

$$89 - 20 = 69$$

$$69 - 5 = 64$$

This strategy is called **partitioning** or the **split strategy**. In subtraction, this is when you break the smaller number into tens and ones.

$89 - 25 = 64$	$73 - 27 = 46$	$92 - 63 = 29$
$74 - 32 = 42$	$96 - 24 = 72$	$83 - 51 = 32$
$86 - 53 = 33$	$74 - 45 = 29$	$38 - 21 = 17$
$95 - 38 = 57$	$40 - 23 = 17$	$77 - 65 = 12$

Complete the questions below.

Use the number line to solve the subtraction.

$$35 - 23 = 12$$

Use the number line to solve the subtraction.

$$24 - 17 = 7$$

Rearrange your number sentence and use the counting on strategy to solve your subtraction.

$17 + 7 = 24$
$24 - 17 = 7$

Solve your subtraction by taking away the tens and then the ones.

$$56 - 12 = 44$$

Solve your subtraction by taking away the tens and then the ones.

$$94 - 62 = 32$$
